EXPERIENCE

Quantile Technologies · acquired by London Stock Exchange Group

New York, NY

Lead Product Manager, Portfolio Optimization

Sep 2025 – Present

- **Compression Setup Agent:** Owned 0-to-1 strategy and launch of a production AI agent for operations with live access to run state, configurations, and client data; cut compression-run setup from 3.5 hours to 8 minutes, enabled 3x run volume at constant headcount, and recorded zero AI-initiated configuration errors over 6 months.
- **Incident Triage Agent:** Led development and launch of an AI support agent pairing 2 domain-specific MCP servers with 6 years of production support knowledge; cut expert incident investigation from 4.5 hours to 11 minutes, reduced engineering escalations by 78%, and freed 750+ senior engineering hours a year for product development.
- **Agent Platform & Controls:** Standardized human-supervised agent architecture across 5 enterprise systems, with reusable MCP servers, domain APIs, Pydantic-typed actions, deterministic services, and evaluation and QA baselines.

Product Manager, Portfolio Optimization

Jul 2023 – Sep 2025

- **Portfolio Strategy & Growth:** Generated \$XM+ in new and expansion ARR by owning end-to-end discovery, product strategy, launch, and GTM for optimization products across rates, FX, and cross-currency swaps.
- **Cross-Currency Compression:** Owned 0-to-1 launch of multilateral cross-currency compression, securing a clearing house's settlement service as counterparty; opened \$X.XT of previously ineligible bilateral notional to optimization in 12 currency pairs, giving 18 banks 34% more notional reduction per run than bilateral optimization.
- **Dual-Source Valuation:** Defined and launched independent swap valuation, removing a single point of failure in \$XT+ compression; caught discrepancies 48 hours earlier and cut failed-run resubmissions by 91% at 24 banks.
- **FX & NDF Compression:** Designed and shipped compression with a clearing house's margin API in the optimizer, reaching 100% proposal acceptance in 40+ live runs; four-source validation cut run failures by 94%.

OpenGamma · acquired by Trading Technologies

New York, NY

Product Analyst

Jul 2022 – Jun 2023

- **Pre-Trade Margin Simulator:** Originated and shipped a 0-to-1 simulator embedded in front-office workflows, with calculations validated against two major exchanges' margin models across OTC and exchange-traded derivatives; enabled institutional clients to find allocations with up to 30% lower initial margin for equivalent risk.
- **Customer Discovery & Roadmap:** Led discovery across trading, treasury, risk, and operations to define the simulator's capabilities, adopted by 20+ enterprise clients: banks, asset managers, commodity firms, and hedge funds.

INDEPENDENT PROJECTS

- **AgentFit:** Scores whether a workflow should get an AI agent and how much autonomy it earns; built with Codex.
- **Gridiron:** Follows every live NFL and college game on a 3D field, with live odds; built with Claude Code.
- **RideLens:** Compares Uber, Lyft, Empower, and Curb on live roads and ranks the best ride; built with Cursor.
- **Daylight:** Native macOS app that shifts screen warmth and brightness through the day; built with Cursor.
- **Also shipped:** RailDrop (Amtrak fare alerts), Cartonry (packaging dielines), and KeepFloor (Etsy pricing floors).

SKILLS

AI & Systems: LLM orchestration, MCP, tool calling, agent evals, human-in-the-loop controls, Python, SQL, AWS

Product: 0-to-1 strategy, platform & API products, pricing & packaging, experimentation & analytics, GTM

Fintech: derivatives compression, portfolio optimization, initial margin, FX forwards & NDFs, CCPs

EDUCATION

Haverford College

Haverford, PA

B.A., Economics & Linguistics · GPA 3.9/4.0 · cum laude · High Honors in Linguistics

May 2022
